Venue

**Al-Farabi Seminar Room, Second Floor,
INSPEM**

Presenter

Dr. Seyed Ali Ahmadian
Research Fellow

Laboratory of Computational Sciences and
Mathematical Physics, INSPEM

Topic

A Strong Research Paper for a Suitable Journal

Abstract

Finding an appropriate journal to submit our research paper is important as well as writing an effective research paper. In this talk, I shed a light on the way to how we can detect a good journal from predatory one and what are the parameters that the editors and reviewers of international journals consider to measure the quality of our submitted manuscripts. Besides, a brief description of how we can write a good paper from achieved results is presented.
